

We not only make your clients' homes look beautiful, we make YOU look good, too.

We Team With Professionals to Create the Lifestyle Dreams of Our Clients

Citrom Home Automation is a full-service company. We provide consulting, design, programming, and installation in any combination. We team up with electrical contractors, general contractors, AV dealers, architects, and designers and provide the opportunity to sell LUTRON® lighting and shade systems to their clients. We can work behind the scenes with you and your installers to help guide installation. We also have our own team to do it all, from initial concept to final reveal.

However Your Company Operates, We Are There to Support You and Your Clients

Eli Citrom personally inspects each and every job, ensuring both you and your clients are happy with the finished results.
